## THREE EASY STEPS TO UPGRADE YOUR EXISTING WOOD-BURNING FIREPLACE:

### STEP 1: MEASURE YOUR EXISTING FIREPLACE AND SELECT YOUR INSERT.

The height, width and depth of the existing fireplace opening is needed to ensure selection of an appropriately-sized insert:

- A. Fireplace front width \_\_\_\_\_ E. Hearth to mantel height \_\_\_\_\_
- B. Fireplace front height \_\_\_\_\_
- C. Fireplace back width \_\_\_\_\_
- D. Fireplace depth \_\_\_\_\_
- If you have a manufactured wood burning fireplace, measure from the inside of the fireplace opening, not the outside trim.

### STEP 2: SELECT YOUR FRONT AND SURROUND

Personalize your gas insert with a front and finish that fits your style. Include a surround to fill the gap between the gas insert and existing fireplace opening. Choose from three sizes and three finishes for a unique look.

SURROUND	ESCAPE-35-IFT SUPREME-I35-IFT COSMO-I35-IFT	ESCAPE-30-IFT SUPREME-I30-IFT COSMO-I30-IFT	SUPREME-I25-IFT
Small	42" x 29"	40" x 27"	35" x 23"
Medium	44" x 32"	42" x 30"	37" x 26"
Large	48" x 32"	44" x 32"	39" x 28"

- SMALL SURROUND
- MEDIUM SURROUND
- LARGE SURROUND

### STEP 3: SELECT YOUR OPTIONS

Choose from our collection of fronts, interior panels, interior media to put the finishing touches on your insert.

## TECHNOLOGIES

### INTELLIFIRE TOUCH IGNITION SYSTEM

IntelliFire Touch is the most advanced and intuitive IntelliFire system, making operating your fireplace simple, smart and safe.

### INTELLIFIRE IGNITION SYSTEM (IPI)

IntelliFire features intermittent-pilot ignition (IPI) allowing you to conserve fuel and money when the fireplace is not in use.

### DIRECT VENT TECHNOLOGY

Direct Vent gas inserts remove 100% of combustion exhaust and fumes to the outside of the home. These sealed fireplaces provide optimal heat, conserve energy and ensure clean, safe indoor air quality.

### FIREBRICK TECHNOLOGY

Available on Escape inserts, FireBrick is a patented, energy-saving ceramic material molded in an authentic masonry design. FireBrick produces up to 25% more radiant heat than metal fireboxes—heating rooms faster and using less fuel. This increases efficiency and reduces heating costs. A unique ceramic composition is at the core of the FireBrick innovation.

Dimensions above are in inches. Reference dimensions only. We recommend measuring individual units at installation. NOTE: Combustible material should not be installed over the face. Make sure you do NOT cover the decorative door opening. Refer to installation manual for detailed specifications on installing this product. Heat & Glo reserves the right to update units periodically. The flame and ember appearance may vary based on the type of fuel burned and the venting configuration used. Pictures in this brochure are not a true representation of the fireplace and/or flames.
